

GEBERIT

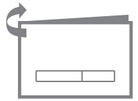

GEBERIT FLUSH PLATES

CHOICE IS **IMPORTANT**

DESIGN
MEETS
FUNCTION

MAKE IT
YOUR OWN

It's not just any bathroom, it's your bathroom. You select the tiles that reflect your style. You refuse to compromise in the selection of the tap for your washbasin. And here you will find just the right flush plate for the toilet to give your bathroom the crowning touch and pamper you with comfort functions. Because Geberit combines visual elegance with innovative functions.

WHY NOT TRY OUT YOUR OWN DESIGNS?

We have included actual-size illustrations of various flush plates in the brochure for you. Fold back the left-hand side of the brochure, hold the design up to the wall and let your imagination run wild! Use these actual-size samples to select the flush plate that appeals to you.

YOUR BATHROOM, **YOUR DESIGN**

Select the flush plate that appeals to you.

GEBERIT FUNCTIONS **99**
Choice is important.

PRECIOUS **METALS**

Selecting the right design options for a bathroom means ensuring that individual nuances are perfectly coordinated. Flush plates in new, fashionable metal colours are the perfect match for the latest trends in taps, while plates made of glass, concrete-look solid surface materials or natural mustang slate and black walnut blend harmoniously into almost any decor style. The ideal combination for your dream bathroom is just waiting for you to discover it.

NEW

REDGOLD

With its intense copper tone and red gold exudes this new finish gives a sense of high-quality warmth in the bathroom and makes a strong statement when combined with luxury surfaces in light or dark shades.

GEBERIT SIGMA21

The red gold flush plate borders for small and large flush volumes emphasises the refined look of the base material used for the flush plate.

BLACKCHROME

The subtle elegance of black chrome is the perfect complement to the dark colours and sharp contrasts between dark and light featured in today's bathroom trends.

GEBERIT SIGMA21

Whether they use a contrasting or tone-in-tone effect, the delicate, black chrome borders around the buttons add a distinct graphical element to the flush plate.

CHROME

This classic choice of metal for the bathroom reveals a completely new side when glossy and matt brushed elements are paired with on-trend plate materials.

GEBERIT SIGMA21

Set in a concrete look for a loft effect or in a natural walnut surface, chrome borders make a real statement. Sigma21 plates with chrome borders are also available in other colours and with other surfaces.

BLACK
ON BLACK

Black is beautiful – and this fashionable interior design colour is now popular in the bathroom too. Geberit's unadulterated interpretation features a stimulating interplay of glossy and matt elements.

WHITE
ON WHITE

Refined matt and glossy surfaces reveal a different side to this classic choice for bathrooms. Design rings and stripes maintain a tone-in-tone look and create subtle accents.

GEBERIT SIGMA20

Set on a glossy or matt surface, these button borders liven up the classic basic colours of black and white. The matt-coated areas feature surfaces that are easy to clean.

AESTHETICS
AND FUNCTION

Unobtrusive yet reliable. Geberit ensures, supreme convenience and durability, all from behind the wall. All that remains visible is the interface with the technology: the flush plate. The selection of flush plates is important because you will live with your selection for years. Choose the flush plate that best suits you and your bathroom from a wide range of options.

New ideas and functions can always be derived from a rectangular shape. This is how Geberit enables you to come up with a contemporary, personalised bathroom design.

THE PERFECT SHAPE: **THE CIRCLE**

Aesthetic curves for a relaxing bathroom experience. It is impossible to improve on circles; they can only be restaged and rearranged. Geberit flush plates use new interpretations of round forms to adapt to today's trends. With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another. And the result is always well rounded.

GEBERIT SIGMA01

GEBERIT DELTA20

The Geberit Delta20 Dual Flush Plate is designed for use with any compatible front actuating Geberit Delta concealed cistern models.

Constructed from a tough plastic material and available in several different finish choices, this product requires an flush force of less than 20N.

Complete with a mounting frame, 2 actuator rods, as well as the fastening material required for secure and proper installation, this unit is ready for use as soon as it arrives.

It is a simple but effective way to complete any compatible toilet design with absolute ease.

NO-TOUCH
FLUSH

Electronic hygiene. Recent surveys have revealed that fewer and fewer bathroom users are happy to activate the flushing process manually - instead, they are increasingly looking for sanitary technology that features touchless operation. By offering electronic toilet flush actuators using infrared sensors, Geberit has a solution to meet this growing demand. And while it requires your toilet to have an electrical connection, this is a feature that is fast becoming the norm anyway.

GEBERIT SIGMA80

- → Water-saving dual flush plate.
- → Touchless flush plate.
- → Surface made of high-quality glass.
- → Durable LED lighting in five colours.
- → Sensor-controlled switch-on function.
- → Multiple award-winning design.
- → View the full range at www.geberit.co.uk

TOUCHLESS GEBERIT URINAL FLUSH CONTROLS

HYGIENE FOR CONTINOUS OPERATION

Perfected flush operations

Geberit offers touchless urinal flush controls for the user, providing better hygiene in semi-public and public spaces.

Ultimately, ensuring that users always encounter a cleanly flushed urinal. Through well-co-ordinated, innovative and tested solutions, Geberit endeavours to guarantee permanent functional reliability, attractive design and economic efficiency.

1-Litre Flush Technology

Geberit urinal flush controls can be implemented with Geberit 1-litre flush technology without any restrictions on flushing effect or hygiene. The WELL Label has therefore awarded Geberit urinal flush systems highest ratings with Class A and six stars.

Elegant and flexible concept

Geberit's hidden urinal flush control sits in the urinal trap, inaccessible and invisible to the user.

This creates a universal installation set for touchless and manual urinal flush controls particularly easy.

GEBERIT
DESIGN FAMILY

Seamless design. Toilet and urinal flush control plate featuring a coordinated design: the result is a single design thread running through the whole bathroom. The flush plates for urinals, which match the flush plates for toilets, can either be actuated by hand (pneumatic) or via touchless technology (electronic, by means of infrared detection).

YOUR STYLE, THE CHOICE IS UP TO YOU

GEBERIT CISTERNS SIGMA AND OMEGA

FOR **ANY APPLICATION**

So that everything matches: used in combination with the matching concealed cistern, Geberit flush plates in the Sigma range cover a wide variety of applications and comfort functions. The Geberit flushing system Omega offers great flexibility and particularly small flush plates. Both flushing systems offer tool-free final installation and guaranteed spare parts availability for 25 years.

You therefore have a wide selection of both Geberit flush plates and reliable Geberit installation elements for installation behind the wall. And Geberit flush plates bear the name of the suitable cistern so that you can be certain that everything will match.

- → Construction height 112 cm and 98 cm
- → Front flush
- → Barrier-free and height-adjustable models available
- → Also available as a corner element
- → Odour extraction (recirculating air / exhaust air)
- → Suitable for Geberit remote flush plate

Geberit Sigma concealed cistern

112 cm

98 cm

82 cm

- → Completely flexible with construction heights of 112 cm, 98 cm and 82 cm
- → Front flush
- → Additional top flush with construction heights 82 cm and 98 cm
- → Particularly small flush plates
- → Suitable for Geberit remote flush plate
- → View Delta and Kappa frames online at www.geberit.co.uk

Geberit Omega concealed cistern

CHOICE IS **IMPORTANT**

Intelligent functions from Geberit. If you can start your toilet flush without touching it, if elegant colour effects add atmospheric moments to the time you spend in your bathroom, or if unpleasant smells are efficiently extracted even before anyone notices them, then this means your plumber has installed state-of-the-art Geberit sanitary products in your new bathroom. And because durability and reliability are as much a part of Geberit as good design, you will enjoy your selection for years to come.

GEBERIT REMOTE FLUSH PLATES

MORE CONVENIENT **BY FAR**

The optimal solution. Regardless of the construction situation, using a remote flush plate can be the right choice. For instance, in order to locate the flush actuation at a different location, if the design for the toilet flush control calls for small but elegant, or if using a Geberit Omega concealed cistern with low construction height causes forceful contact between the toilet lid and the front actuation. For such cases, Geberit offers various remote flush plates with pneumatic force transmission, which can be placed anywhere within a 1.70 m radius of the concealed cistern.

→ REMOTE FLUSH PLATE

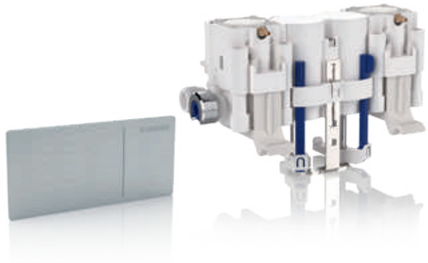

→

TOUCHED A THOUSAND TIMES

The pneumatics of the Geberit remote flush plates type 01 and type 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

←

A TOUCH MORE REFINED

Thanks to the hydraulic servo lifter, just a gentle touch is sufficient for flush plates with the Geberit remote flush plate type 70. And no electrical current is required for this.

→

QUITE DISCREET IN FACT

Available as they are in a variety of colours and product materials, the Geberit cover plates open up new design opportunities. A tile-bearing version is available for a particularly discreet appearance.

GEBERIT DUOFRESH INSERT
FOR IN-CISTERN STICKS

HYGIENIC FRESHNESS FOR WEEKS

Pull the flush plate aside, insert the stick, then close the plate.
That's how easy it is to ensure weeks of hygienic freshness with the insert for in-cistern sticks. The optional insert is suitable for most Geberit flush plates in the Sigma range and can even be installed by a plumber at a later date. It guides the in-cistern stick down a chute to a fixed position below the surface of the water in the cistern. Once there, the stick dissolves slowly and ensures hygiene and cleanliness in every flush throughout the entire toilet ceramic appliance, as well as providing a fresh fragrance.

1 It doesn't get any simpler than this: pull the flush plate aside. **2** Place the in-cistern stick into the insert behind the plate. **3** Close the plate and enjoy the freshness with every flush.

IN-CISTERN STICK

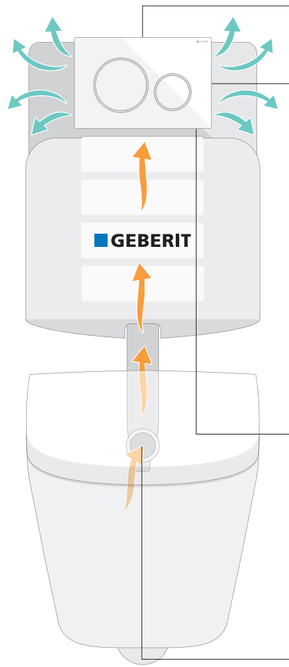

FRESH AIR
FOR EVERYONE

Unpleasant odours in the toilet are a thing of the past.
What is long since standard over every kitchen stove can now be applied in the bathroom. An effective way to get rid of unpleasant odours. The Geberit DuoFresh module removes the bad air directly from the toilet ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room.
This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathroom in the first place, rendering air fresheners, lighting candles, opening windows and the like completely unnecessary. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore also a great idea for guest toilets. Benefit from additional comfort thanks to an LED orientation light and the insert for in-cistern sticks.
The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any flush plate from the Sigma range.

→ ODOUR EXTRACTION

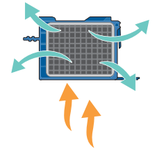

The ceramic comb filter and insert for in-cistern sticks are within easy reach located behind the flush plate.

The ceramic comb filter purifies the air thoroughly. The quiet fan conveys the cleaned air back into the room.

An additional benefit offers a built-in LED orientation light. Just below the flush plate a soft glow will guide you to the toilet – simply perfect.

Unpleasant odours are removed right at the source.

TOUCHLESS FUNCTION

AESTHETICALLY HYGIENIC

→ TOUCHLESS

You're looking for hygiene and freshness without compromise. We offer flush plates that fulfil your need without a touch, without pressing a button and therefore always hygienically.

Touchless flush plates for toilets and urinals are available in suitably matched designs.

TODAY'S TOILETS ARE MOVING WITH THE TIMES

Electrical connections now come as standard. After all, you expect your bathroom to reflect your changing needs as well as the lifestyle trends that the future is likely to bring. In Geberit toilet installation elements, you'll find everything completely prepared for the future – so it can accommodate any changes you want to make in the future, like retrofitting a Geberit AquaClean shower toilet, a convenient odour extraction unit or installing the coloured LED strips that come with the touchless Geberit flush plate Sigma80.

1 Geberit DuoFresh module with integrated orientation light. Suitable for several flush plates of the Sigma series. **2** Touchless Geberit flush plate Sigma80, glass reflective. **3** The Geberit AquaClean Mera shower toilet with outstanding design and numerous comfort features.
